

## HTTP File Transfer

HTTP File Transfer – This service allows you as the user to send and receive files using a web browser. Via our transfer system, you are able to easily initiate file transfers with just a few clicks. Simply add your files and folders to the files panel and your files are instantly uploaded and imported into our cleansing process. Your results are returned within the same panel.

1. To utilize our HTTP File Transfer Service, please log in through our portal.
2. Once logged in, proceed to the transfer by file center on the left-hand side of the portal. Once here, you will be presented with the option to upload your files.

3. To transfer by file, simply select the file from the computer that you wish to upload, and drag it into the box labeled "Drag & Drop" files here, or select "Browse Files" and select the data you wish to be cleansed.

4. Once uploaded, your files will be retrieved within minutes and upon completion, they will be returned to you with a full report outlining the details of your cleansing.
